

RAKCHHAM – SUNNY SIDE

Character Sunshine all day long, great climbing mainly in the 6th and 7th grade and mostly good landings make this sector a perfect and very pleasant place to spend colder days. Only inconvenience: The approach is long and steep. Most of the brushing and the first ascents were done by Steffen Kern in 2013 and 2014 (SK). Around 150 meters below the Sunny Side you find the kingline *Keep it safe in the mountains* (8A) from Bernd Zangerl and some more nice problems. So far around 60 problems are climbed but there's still a lot of potential around.

Access From the main road enter the village through the entrance gate. Walk up to the new temple, pass it on the right, then follow the trails up diagonally to the right to the end of the village. Go some meters to the left (water bassin), then follow the winding steep trail uphill. Around 45 minutes.

- 1 a Ganesh, Ganga, Ganja**
6B *** sit 4,5 m
Climb the flake, top out onto the slab right of the arête. Attention, there's a crack in the flake! SK 2014

b Mallory & Ivory
